

# Dotec-Audio DeeDoubler

## User's Guide

### About DeeDoubler

Thank you for choosing Dotec-Audio DeeDoubler.

DeeDoubler is a audio plugin with following features:

- You can easily create a double-take by adjusting the AMOUNT parameter.
- The DELAY parameter can be easily adjusted to the desired sound.

### Installation on Windows OS

1. Those plug-ins are provided as a .dll and .vst3 and .aaxplugin folder (AAX).
2. To install the plug-ins, simply copy it to your system's shared VST or VST3 or AAX folder.  
**AAX folder** : *C:\Program Files\Common Files\Avid\Audio\Plug-Ins*
3. If you're not sure where that is, please consult your music software's documentation.
4. If your music software is already running, you'll probably need to quit and restart if before the plugin is recognised.

### Installation on MacOS

1. Those plug-ins are provided as a .vst (VST) and .component (AU) files and .aaxplugin (AAX) files.
2. To install the plug-ins, open “**install.pkg**” and follow the installer instructions.
3. If your music software is already running, you'll probably need to quit and restart before the plugin is recognised.

## Panel Description
