

Dotec-Audio DeeMaximizer

User's Guide

About DeeMaximizer

Thank you for choosing Dotec-Audio DeeMaximizer.

DeeMaximizer is a VST plugin with following features:

- The 32-band multi-maximizer gives a clean and powerful sound.
- Each band is automatically optimized and easy to use with a big dial.
- With zero latency, it does not affect instrument input and can be used while composing.

Installation on Windows OS

1. Those plug-ins are provided as a .dll and .vst3 and .aaxplugin folder (AAX).
2. To install the plug-ins, simply copy it to your system's shared VST or VST3 or AAX folder.
AAX folder : *C:\Program Files\Common Files\Avid\Audio\Plug-Ins*
3. If you're not sure where that is, please consult your music software's documentation.
4. If your music software is already running, you'll probably need to quit and restart it before the plugin is recognised.
- 5.

Installation on MacOS

1. Those plug-ins are provided as a .vst (VST) and .component (AU) files and .aaxplugin (AAX) files.
2. To install the plug-ins, open “**install.pkg**” and follow the installer instructions.
3. If your music software is already running, you'll probably need to quit and restart before the plugin is recognised.

Panel Description

Enable/Disable Switch (Lightning Switch)

Enables/Disables DeeMaximizer.

RELEASE

Sets the length of the release. The shorter the release, the easier it is to increase the sound pressure; the longer the release, to reduce distortion.

SOFTKNEE

The higher the value, the smoother the sound compression and the less distortion.

CH LINK

The higher the value, the stronger the synchronization between left and right or mid-side.

SOFTCLIP

Softens the distortion when the sound pressure is increased to the limit.

CHANNEL MODE

Switches the input method to left, right, or mid-side.

SAFE button

ON makes distortion suppression a priority over sound pressure.

MAXIMIZE

The higher the value, the higher the sound pressure. Click on the value to switch between % and dB.

INPUT

Adjusts the input level. Adjust the meter to -6dB as a standard.

OUTPUT

Final adjustment of the output volume.

Meters

Indicates INPUT, OUTPUT, and GR (gain reduction).

The values hold the maximum value and can be cleared with the RESET button.

How to Register

The DOTEK-AUDIO product becomes the "**product version**" by registering the serial key and e-mail address in the "**demo version**".

This section describes how to register the serial key you purchased.

Step 1

You can register serial key by clicking registration button.

Step 2

A screenshot of the 'Registration' dialog box. The dialog box has a title bar that says 'Registration'. Below the title bar, it says 'Please enter the serial key and your e-mail address for the registration.' There are three input fields: 'Serial key', 'E-mail address', and 'E-mail address(Verify)'. Each input field has a red arrow pointing to it. At the bottom of the dialog box, there are three buttons: 'Open the shopping page', 'Cancel', and 'OK'. The 'OK' button is highlighted with a red border.

This window will be displayed.

Please enter a serial key and your email address in the textbox and click OK button.

*** The registration requires an internet connection.**
